- **Do I need an appointment?**

Appointments are preferred, but walk-ins are welcome. My hours are posted in my highlights, I will always be available for walk-ins then! The only time we require appointments is for stretching, genitals, and minors under the age of 14.

- **What do I use to clean my piercing?**

You will be given full written aftercare instructions as part of the service. The only thing we recommend is sterile saline wound wash solution (we have some for sale in the studio!) and antiseptic alcohol-free mouthwash for oral piercings.

- **Do you perform the snake eyes or frog eyes piercings?**

No. Any ethical professional who is aware of the risks involved with these piercings will not perform them. I invite you to do your own research on these piercings. The tongue is made up of multiple separate muscles. That is why when people get their tongue split, they can move each side separately. Piercing together muscles that are meant to function separately is just not a good idea medically. It can cause long term damages to your oral health and can possibly break teeth and cause speech impediments. It is not worth it and performing it is a cash-grab and a disservice.
